

Project Roadmap

Project team workshop tackling methodology of expert elicitation and audit development

Delivery of co-production workshops with climate scientists and three community organisations

Project team workshop tackling survey synthesis and discussion

Create a register of expertise based on survey responses

Collate existing research on climate communication and produce confidence statements

Summary workshop reporting project outputs, outcomes and considering future activities

Website development and content uploads

Survey launched to project partners, climate science networks and social media

First analysis of survey responses and evaluation of climate engagement practices

Revisit survey and draw out key information to share

Evaluate auditing and synthesis process and share summative report on our methods

Share resources and training materials with audiences
